Product Catalogue

RODSOCK has been designed for the serious fisherman who is fastidious in the way they look after their fishing rods and tackle.

RODSOCK are fishing rod covers specifically designed for the protection and storage of Fishing Rods to minimize damage including abrasion, dirt chipping and moisture residual.

All **RODSOCK** covers are manufactured from 100% Cotton fabric in 8 Sizes from 5'6" to 13'6" in Natural and Black colour.

- We only manufacturer in Australia
- only using fabric converted in Australia
- From Cotton grown in Australia

RODSOCK covers are made from soft and supple cotton in a seamless construction to provide excellent stretch and recovery characteristics with a minimum stretch width of 115mm (4.5") to easily fit over large guides on most rods. ☺

Closure of the **RODSOCK** is simple. Just knot the excess around the rod tip and cuff the **RODSOCK** back over the rod to provide additional protection to delicate rod tip' ☺

As well as being designed for protection of 1 piece Fishing Rods they can also be adapted to 2-4 piece rods.

Simply place your Fishing Rod in 1 piece into the **RODSOCK** and close as normally. Find the ferrule joins and gently separate & folding each piece down. Recuff over the folded sections to hold. They will mould and take the form of your Fishing Rod whatever the shape due to its flexible construction. Use them on your favorite Fly, Spinning, Baitcaster and even Big Game Rods. ☺

Store your rods in the **RODSOCK** cover as normally. Then when traveling you can place them in PVC tubing without the fear of abrasion or scratching. ☺ See right photograph.

Get wrapped in RODSOCK protection for your rods and reels.

By sliding the **RODSOCK** cover over your rod when rigged you protect and minimize the opportunity of line tangling with other rods whilst traveling to your next location.

Just inverse the normal process as shown in the photograph above. ☺

RODSOCK hasn't forgotten about your fishing reels. We offer 2 designs both using soft natural cotton. The cotton naturally drawing moisture away from the reel chassis and line to keep your reels dry and clean.

The first is designed to fit overhead reels. Made in the **RODSOCK** material it is designed to fit across the drum and line of your reel.

The second is a versatile reel bag made from double lined cotton with a Velcro closure tab. At 12" x 7" it will cater for most threadline or overhead reels.
